Commissioner for Patents

Re: substitute specification and examiner's amendment

This application contains a marked-up version of the substitute spec. but did not contain a clean copy. The examiner called applicant to request that a clean copy of the substitute spec be filed. Applicant suggested using the specification from US 6,677,243, the parent application as the substitute specification and provided the examiner with the language for an amendment to identify this application as a divisional. The examiner obtained a copy of the substitute specification from the parent application (09/867,243) to serve as the substitute specification in this application. The attached examiner's amendment merely identifies this application as a divisional.

Allan Olsen
Primary Examiner
Art Unit: 1792

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Daniel Glueck on December 21, 2007.

The application has been amended as follows:

After the title, "METHOD OF MANUFACTURING OPTICAL ELEMENT" and before the section heading "BACKGROUND OF INVENTION", insert the following paragraph as paragraph [0001]:

This application is a division of Appln. No. 09/867,492 filed May 31, 2001, Patent No. 6,677,243 B2.
